

# POWDER CONCENTRATE

It's what you put in  
when you **STOP...**  
That's keeps it working  
when you **START!**

**STOPS CORROSION · RUST · CLEANS · PROTECTS**  
Spray Equipment, Pumps, Mixers, Machinery.

## CP51b

Add one ounce per gallon of tap water,  
run throughout airless equipment.  
Makes up to 80 gallons of finished product.

## CP5oz

Add one packet to 5-gallons of  
tap water and stir.  
25 packets per box.

## CPIoz

Add one packet to one  
gallon of tap water and stir.  
48 packets per box, 4 boxes per case.

# It's what you put in when you **STOP**... That keeps it working when you **START!**

**Coro-Chek** is a concentrated blue liquid water additive that stops Corrosion and rust. Its multi-purpose action keeps paint equipment clean and operating efficiently by keeping paint particles wet and in suspension. Keeps ball checks lubricated, free from rust and ready for next paint to be cycled through machine without special flushing cycle.

Does not contaminate paint; in fact, it's compatible with water base paints. **Coro-Chek** is economical because it is highly concentrated. As little as one ounce per gallon of water is an effective rust preventive solution that keeps your equipment clean. No messy oil or flammable solvents, no congealing of paints, no oil clogged filters, no contaminating

of product, no disposal problems when cleaning or purging pumps.

The most critical period for corrosion and rust in airless equipment is from the time the user stops spraying until the equipment is used again. Make sure **Coro-Chek** is protecting the equipment you use, sell or service.
